

WINDOW INSTALLATION METHOD B

Mounting Flange Window installed in a Membrane/Drainage System

Window installation based on Method "B" requires:

- The sill and jamb flashing to be applied before the window is installed (behind mounting flange). Head flashing is installed after the window is in place.
- WRB is applied after the window is installed

INSTALLATION GUIDE:

INSTALL SILL FLASHING (STEP 1)

- Cut flashing material to correct length Prepare materials in advance of window (Figure 1)
- Apply horizontal sill flashing level with top edge of rough opening
- Each end of the sill flashing should extend approximately the width of the flashing beyond the rough opening at the jamb conditioning
- Allows for installation of WRB to slip behind sill flashing in a weatherboard fashion

INSTALL JAMB FLASHING (STEP 2)

- Install jamb flashing on the left and right sides of the rough opening over the flange (Figure 2)
- Terminate jamb flashing approximately 1/2" beneath the top horizontal outside edge of the head flashing. Terminate jamb flashing 1/2" above the bottom horizontal outside edge of the sill flashing

WINDOW INSTALLATION (STEP 3)

- Install window per Window Manufacturer requirements (Figure 3)
- Flashings may not be compatible with all sealants, use sealants as indicated or verify compatibility as directed in AAMA 713
- Apply a continuous 3/8" bead of sealant on interior side of window flange

INSTALLATION GUIDELINES AND LIMITATIONS

- INSTALLATION "METHOD B" REFERS TO COMMON WINDOWS (SURFACE MOUNTED).
- INSTALL WINDOW PER WINDOW MANUFACTURER REQUIREMENTS.
- SEE PRODUCT SPECIFIC TECHNICAL DATA SHEET FOR ROLL SIZES, MAXIMUM UV EXPOSURE, COMPATIBILITY CONCERNS, APPLICATION TEMPERATURES AND SERVICE TEMPERATURE LIMITATIONS.
- FLASHINGS MAY NOT BE COMPATIBLE WITH ALL MATERIALS AND SEALANTS. VERIFY ALL MATERIAL COMPATIBILITY AND VERIFY SEALANT COMPATIBILITY AS DIRECTED IN AAMA 713.
- HAND ROLL WITH FIRM PRESSURE SELF-ADHERED FLASHING MEMBRANES TO OBTAIN CONTINUOUS ADHESION.
- SUBSTRATES MUST BE CLEAN AND DRY.
- VERIFY WATER-RESISTIVE BARRIER and Flashing Membrane are FREE FROM PROTRUSIONS OR DAMAGE PRIOR TO CLADDING INSTALLATION.
- CONTACT TARCO AT 800-365-4506 FOR TECHNICAL ASSISTANCE.

INSTALLATION GUIDE:

HEAD FLASHING

(STEP 4)

- Apply window flashing over window head and over the flange (Figure 4)
- Extend head flashing at least 1" (25MM) beyond the outside edge of the jamb flashing on both sides

INSTALL THE WRB

(STEP 5)

- In weatherboard fashion starting at the base of the wall, install WRB to the face of building framing or sheathing
- At the sill of the windows, tuck the WRB under the sill flashing and loose ends of jamb flashing
- Continue to apply WRB in weatherboard fashion up and over the jamb and head flashing
